Art Unit: 3723

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Figure 1 of the instant application in view of Morgan or Ljungstrom.

Figure 1 of the instant application is considered by applicant to be prior art.

Figure 1 of the instant application discloses all of the claimed subject matter except for having six pair of curved actuating surfaces on the follower. Figure 1 of the instant application discloses six pair of flat actuating surfaces on the follower. Morgan (fig. 7, lines 20-35 of col. 3) or Ljungstrom (figs. 1-3, lines 1-20 of page 1) disclose recesses bound by curved actuating surfaces. It would have been obvious to one having ordinary skill in the art to form the actuating surfaces of Figure 1 of the instant application as curved for wedging engagement between the clutching elements as taught by Morgan or Ljungstrom.
